PETROGRAPHIC ANALYSIS FOR THE OIL INDUSTRY: TARGETS AND METHODOLOGY OF WORK

Speaker: Salvatore Morano (www.moranopetrography.com)

The seminar will provide an overview on the ?Targets? & ?Methodology of work? (e.g. types of software) of the petrographic analyses on sandstones and carbonates carried out for the oil industry, with emphasis on the assessment of reservoir quality.

Salvatore Morano earned a PhD in sedimentary Geology from the University of Naples; Postdoctoral collaboration with Depart. Earth Sciences of Universite? Libre de Bruxelles, Belgium; Postdoctoral fellowship in Sedimentary Petrography from the Univ. of Burgundy, France; Supervisor of Geology Department at Corex, UK (oil industry); Senior staff petrographer at Core Laboratories (major USA service company, oil industry); Acting technical development Manager at ALS Petrophysics (Australian company, oil industry); he relocated in Italy after 13 years abroad, and works now as consultant for the oil industry on petrographic/reservoir quality analyst of siliciclastic/carbonate reservoirs.
